### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/JP2004/004860

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement				
1.	Statement			
	Novelty (N)	Claims	1-10	YES
8		Claims		NO
	Inventive step (IS)	Claims		YES
		Claims	1-10	NO
	Industrial applicability (IA)	Claims	1-10	YES
	•	Claims		NO

## 2. Citations and explanations (Rule 70.7)

Documents 1 to 3, as indicated below, are cited in the international search report and in the written opinion that was drafted by the international searching authority.

Document 1: JP 2001-303986 A

Document 2: JP 9-163708 A

Document 3: JP 2000-232742 A

Documents 1 to 3 disclose proportional rotary torquers.

In the invention that is set forth in claims 1 to 10 of the present application, numerical ranges are delimited for the thickness of the permanent magnet, the distance to the rotational center and the angles between the connecting lines; however, it is considered to be within the common creative abilities of a person skilled in the art to delimit the numerical ranges in question so as to impart desired drive characteristics, as appropriate.

Consequently, the invention that is set forth in claims 1 to 10 of the present application does not involve an inventive step.
